Email archiving in perfect formation

Help your Microsoft Office 365® migration take flight, with Symantec Enterprise Vault.cloud™

Corporate email volumes were expected to grow by **68%** through 2012, leading to an annual increase in storage needs of
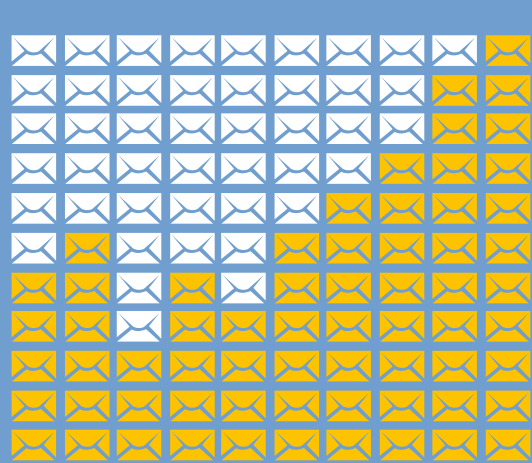

40%! [1]

Are you ready to begin migration to Office 365?

Yes, but we're concerned about managing information and fulfilling regulatory requirements.

Have you considered adding functionality and value through third-party solutions such as archiving?

Our data is already backed up, why do we need to archive?

THE FIGURES

The typical corporate user is estimated to **send** and **receive**

110

messages every day. [2]

75%

of legal cases now require the submission of email. [3]

Why archive?

In this digital age, don't let systems and users drown under the volume of data contained within emails.

Use an archiving solution to safely and securely store and manage the information…

…until you need to access it, when the advanced search functionality allows quick and easy access to maintain user productivity.

THE FIGURES

38%
of business survey respondents prioritised deploying archiving to better manage storage;

35%
managing eDiscovery; and

35%
managing regulatory compliance. [3]

5 reasons why Enterprise Vault.cloud complements your Office 365 deployment

Better together

1 **2** **3** **4** **5**

Meet advanced compliance and legal requirements

Easily add advanced archiving and eDiscovery capabilities to your Office 365 deployment, helping you to satisfy your organisation's compliance and legal requirements.

Provide a seamless end user experience

Single Sign On capabilities allow your users to access their personal archive in Enterprise Vault.cloud directly from Microsoft Outlook® or Outlook Web App (OWA) using their existing Active Directory username and password.

Easily deploy the archive

Enterprise Vault.cloud is the only third-party archiving solution that allows you to manage and provision users and mailboxes in one place with automated directory syncronisation to Office 365.

Streamline your email migration

Archiving legacy data before you migrate means you don't have to move data from your old email platform to Office 365, accelerating your migration time frame and helping to reduce costs.

Trust in market leadership

Symantec is a recognised leader in the enterprise information archiving and eDiscovery software spaces.*

*Symantec named a leader in the Gartner Magic Quadrant for Enterprise Information Archiving, 6 December, 2011. Gartner does not endorse any vendor, product or service depicted in its research publications, and does not advise technology users to select only those vendors with the highest ratings. About Enterprise Vault.cloud

Enterprise Vault.cloud is the only third-party archiving solution with automated directory sync to Office 365, allowing you to manage and provision users and mailboxes in one place. In simple terms, each time you create a new Exchange Online user in Office 365, a new archive account is automatically provisioned for them in Enterprise Vault.cloud. This functionality also allows you to automatically synchronise email addresses in Office 365 within the Enterprise Vault.cloud archive.

Enterprise Vault.cloud also enables advanced archiving and eDiscovery capabilities that exceed the native Office 365 archiving features available with Exchange Online Archiving (EOA), helping you satisfy your organisation's legal and compliance requirements.
